For over 40 years we’ve been building better doors. Doors that offer unbeatable quality, convenience and design. Doors built in America, by people passionate about everything that opens and closes. Wood, fiberglass, steel. We work with them all. Fashioning doors engineered to perform- day after day, after day. So, whether you’re after one, or many, be confident. Because with MASTERCRAFT®, you will always get a great door, inside and out.

**Quality**
Doors are opened, closed, slammed, kicked and knocked on every day. No matter the material, ours are built to last.

**Customization**
Doors allow you to express your creativity and personalize your home; this is why we offer the opportunity to design a door that is right for your home.

**Convenience**
We make buying a door easy, fast, and reliable. Yes, customized doors that are built and shipped to you quickly.

* *1-year Warranty on Finish*
What you can expect from your MASTERCRAFT® Steel Door.

A. **Complete Frame System**
   Choose from multiple frame options featuring high performance compression weatherstripping.

B. **Energy Efficient Insulated Glass**
   Safety tempered insulated glass.

C. **Reinforced Lock-Block**
   Added to provide strength and security.

D. **Rigid Steel Construction**
   Durable 24 gauge galvanized steel surfaces resist rust, peeling and warping.
   MASTERCRAFT® Steel Doors are built with a wood stile and composite rail, providing maximum protection against temperature fluctuation.

E. **Polyurethane Foam Core**
   An environmentally friendly Polyurethane foam is sprayed in, allowing it to fill every inch of the door. This helps make MASTERCRAFT® Steel Doors one of the most energy efficient doors on the market.

F. **High Definition Door Panels**
   Deep embossing creates a sharp and detailed look, adding to the curb appeal of each door.

G. **Tight Sealing Sweep**
   The flexible bottom sweep creates a tight seal to prevent water or air infiltration.

H. **Superior Sill Construction**
   Our sill is designed to prevent energy loss and build-up of condensation and adjusts to create a tight seal. Each sill features a composite bottom that will not rot.

### Solid Color Finish
- Superior paint coverage for a guaranteed smooth, low-maintenance finish
- **MASTERCRAFT®** Steel Doors go through a 7-step finishing process
- Resistant to ultraviolet rays to eliminate color fading
- Beautiful consistent color to last a lifetime

### Woodgrain Finish
- Provides the strength and energy efficiency of steel. Get the look of wood, without the maintenance
- Steel door covered with a wear resistant, 7 mil thick vinyl, creating a corrosion, chemical, and scratch resistant surface that is 5 times thicker than paint

---

**Have your steel door prefinished and let us do the work for you. We offer a Limited Lifetime Warranty on our Prefinished Steel Doors and on the finish!**

*Prefinished options available in 32" & 36" sizes*

No matter the season

**MASTERCRAFT®** Steel Doors are the most efficient door you can buy.

**Environmental Focus**

**ENERGY STAR® Qualified**
We make one of the most energy efficient doors in the industry.

We offer a wide variety of ENERGY STAR qualified **MASTERCRAFT®** doors, which exceed strict energy efficiency standards, placing us at the top of the list when comparing energy performance as tested by an independent third party.

**NFRC Certified**
The NFRC Certification means that **MASTERCRAFT®** Doors meet or exceed the energy rating standards set by the National Fenestration Rating Council (NFRC), a group of independent industry designers who have established uniform energy rating standards.

For more information, and to view performance results, visit [www.nfrc.org](http://www.nfrc.org) and [www.midwestmanufacturing.com](http://www.midwestmanufacturing.com)

Environmental Impact is important to us, which is why we developed an extensive recycling program in our facilities and create strong partnerships with suppliers who are part of the Sustainable Forestry Initiative.

---

Dark Oak option available for 6 lite 22" x 14½ 3-Panel Mission.
Door Frames are available in many materials and widths to meet your needs. All come with high performance compression weatherstripping to prevent air and water infiltration.

*All frame options shown with matching Brickmould.

---

### Primed Frame
- **Features**
  - Primed, ready to finish
  - All wood construction

### Composite Frame
- **Features**
  - Will not rot, absorb water, or fade
  - Same finish inside and out

### Oak Frame
- **Features**
  - Solid Oak construction for easy staining
  - Allows interior and exterior to be stained to match existing woodwork in your home

### White Steel Frame
- **Features**
  - Expandable frame from 4 ¾" - 5 ½" or 6 ¾" - 7 ½"
  - Made completely of metal
  - No Brickmould

### Aluminum Clad Outswing
- **Features**
  - Superior strength, snap on brickmould and folding nailing fins
  - Allows interior to be painted to match existing woodwork in your home

*Required for Primed Frame

---

**Painting Your Frame**

We recommend lightly sanding then painting wood frames with a high quality latex paint. Once a year, verify that the paint is still in good shape, not flaking or peeling. Repaint if needed.

---

**Aluminum Clad Outswing frames have a scant profile brickmould to allow further opening. Cannot be used with standard storm doors.**
This high-profile outswing sill, with advanced weatherstrip, is engineered to create a tight seal and keeps water and air from infiltrating your home. (double doors only)

MASTERCRAFT® adjusting sills are designed to prevent energy loss and build up of condensation while creating a tight seal, every time.

ADA Accessible Sill

Our ½” tall ADA accessible sill meets residential and commercial building codes while maintaining the proper slope to keep air and water out.
Glass Accent Options

Glass accents are the metal bands that join the glass together on select glass options. Choose hinges and a sill to match the glass accent to tie the look of the door together.

Hinge Options

Choose hinge colors to match your style and complete the look of your door.

**Standard Exterior Hinges**
- Removable Pin (for easy door removal)
- 3 Hinges used per door
- 4"x4" Hinge size

**Spring-Loaded Exterior Hinges**
- Allows door to close automatically, with adjustable tension, to ensure a proper closing force
- 2 Hinges used per door and 1 standard hinge
- 4"x4" Hinge Size

Kickplate Options

Adding a kickplate to any door provides increased durability and protection to a commonly mistreated portion of the door. The three color options available will allow you to match other accessories on your door.
3-Point Security Locking System

Add a factory-installed security locking system to your exterior door and leave the worries behind you.

- High quality locks offer maximum protection for you and your family
- Concealed, tamper-proof deadbolts leave a flush door surface
- Lock features an anti-slam and anti-mishandling function
- Lock tongues engage and pull into metal strike plates for maximum security and weatherstrip compression
Pet Accessible Doors

Complements most 32”, 34”, and 36” wide doors with a 6-panel or 6-panel with 22”x36” lite panel design.

- Paint-ready, raised mould design
- Flexible vinyl flaps
- Internal strengthening ribs
- Factory-installed for perfect fit every time
- Plastic snap-on closing panel when limited access is necessary
- Soft, dual flap for tight weather seal
- Outer-frame weather resistant design

Peep Site Options

Peep sites provide added function and increased privacy and come factory installed in your door.

Brass        Satin Nickel        Oil-Rubbed Bronze

Dentil Shelf

The Dentil shelf complements a mission style door and adds an extra level of detail to your home.
**Continuous Sidelite Door Systems Benefits**

- **Interlocking Heads**
  Continuous heads with interlocking mull posts for exceptional strength

- **Installation Clip**
  Keeps the door square for easier installation

- **Weatherstrip**
  High performance compression weatherstripping and corner seals create a tight seal to keep the weather out.

- **One Piece Mull Construction**
  Our mull systems include inactive seats engineered for perfect sidelite panel placement.

- **Sill Gaskets**
  Provide second water barrier between the sill and the frame

- **Engineered Sidelite Gasket Seats**
  Engineered for perfect panel placement and a clean finished look

---

**Inswing Double Door Systems Benefits**

- **Installation Clip**
  Helps keep the door square for easier installations

- **Pre-Installed Catch Plates**
  Speeds up installation

- **Thermally Broken Astragal**
  Reduces cold transfer

- **Weatherstrip**
  High performance compression weatherstripping and corner seals create a tight seal to keep the weather out.

- **Sill Gaskets**
  Provide second water barrier between the sill and the frame
Corner Seals:
All of our MASTERCRAFT® doors have corner seals installed in the bottom corners of the frame on an exterior door. These seals help to prevent air leakage and water from entering the home. Make sure that the corner seals are in good condition once the door is installed. If a seal shows signs of damage, promptly replace the damaged seal with a new corner seal, which are available at your local MENARDS® store.

Caulking of door:
All exterior frame styles need to be caulked in three major locations to stop the infiltration of water and air:

A Caulking around the brickmould- A bead of caulk should be applied around the outer edge of the brickmould and where the brickmould contacts the frame to prevent infiltration from between the door and the house.

B Caulking around the sides of the sill- The sill should be caulked from the front of the sill, around the weatherstrip and corner seal, to the back of the sill; anywhere the sill contacts the frame.

C Caulking under the sill- Caulk underneath the sill and along the bottom of the sill, where the sill connects to the ground.

Check these areas once a year and recaulk as needed. Keeping these areas caulked will increase the life span of your door maintaining its function and beauty for years to come.
