CARE & MAINTENANCE - Quartz

Recommended cleaners include Simple Green®, Rock Doctor cleaner, Mr Clean Magic Eraser®, and denatured alcohol.

To clean the surface, wash with a mild dish washing liquid or powdered detergent; add warm water. Use a soft dish cloth. Rinse with warm water and dry with cloth. Water is generally all that is needed. A quick wipe will clean most stains and maintain the rich, lustrous gloss.

For Harder to remove spots, use an all-purpose cleaner or bathroom cleanser. Follow the manufacturer’s instructions. Rinse with warm water and dry with a soft cloth. Please note, do not use cleansers that contain harsh abrasives.

For stubborn spots, make a paste with baking soda and water. The paste will be slightly abrasive. Work carefully to keep from damaging the surface you are cleaning. Dip a soft bristle brush into the paste to cover the bristles. Gently rub the spot with the brush, moving in a circular motion and pressing very lightly. You may also use a Magic Eraser® following the manufacturer’s instructions for stubborn stain.

While RiverStone Quartz™ is designed to withstand heat better than most countertop materials on the market. It can be damaged by extreme temperature changes, whether sudden or prolonged. Always use a hot pad or a trivet when placing hot items on your countertop surface. These items include, but are not limited to, pots, pans, hot plates or crock-pots.

A FEW NOTES OF CAUTION

- Drain cleaners containing lye will permanently damage quartz surfaces. If you spill a drain cleaner, wipe it up immediately and rinse several times with water.
- Hair, textile and food dyes can cause permanent stains. If dye should happen to spill, wipe it up immediately with dishwashing detergent or an all-purpose cleaner.
- Rust removers contain harsh chemicals which can quickly cause permanent color changes. If a spill occurs, wipe off all residue immediately, wash thoroughly with soapy water and rinse several times.
- Steel wool and other abrasive pads will damage Quartz countertops. Don’t use them for cleaning and don’t store steel wool pads on your countertop; metal can rust and leave stains.
- RiverStone Quartz™ has a durable surface that is made to withstand normal use. While it is resistant to scratches, cuts, and chipping, cutting directly on a quartz surface should be avoided. Use cutting boards and take care not to move or drop heavy objects on the surface.
