At UltraDeck®, we want you to spend less time working on your deck, and more time enjoying it—Living the Deck Life: grilling with family, gathering with friends, or just escaping the everyday. Because, when the Sun is out, the last place you want to be is inside. Burgers and brats are at their best, straight off the grill. And, time spent on a deck will always be time well-spent.
QUALITY.

The quality of our decking impacts the quality of the time you spend on it. That’s why we are committed to decades of research and testing, and why we continue to use state-of-the-art machinery, the highest quality materials, and the latest advancements in composite technology, to produce every product.

SIMPLICITY.

We wholeheartedly believe that when you can build a deck yourself, you enjoy it more. That’s why our entire range of products is engineered to be easy to handle, cut, install, and maintain - no specialized tools or experience required.

LOCAL.

So much of owning a deck is about connecting with people close to you, people who share your life and values. We think the same way about manufacturing. That’s why UltraDeck® is American made, and why we are dedicated to keeping good people and good jobs close to home.
SUSTAINABILITY

At UltraDeck®, our midwestern values run deep. We love the outdoors and are dedicated to preserving our environment. That’s why we use a unique blend of recycled and engineered materials to produce a range of products that are easy to handle and even easier to maintain.

Guaranteed for up to 25 years, our products offer a brilliant, sustainable alternative to traditional lumber. They keep harsh chemicals from our waterways (as they don’t require chemical cleaning, staining or maintenance), and save over 20,000 trees a year from being cut down. So, if you love mother nature as much as we do, consider UltraDeck®.
REST, PARTY, GRILL, & PLAY A WHOLE LOT EASIER.

Our products are built to endure extremes. The dramatic temperature shifts. The storms. The searing heat and the blistering cold. Engineered to stand up to the elements, UltraDeck® won’t split or warp and is guaranteed to resist impacts, stains, rotting, fungal decay, and insect infestation. So, even when there’s snow on the ground and clouds in the sky, you’ll know that when the sun finally comes out, your deck will be there, ready to help make the most of it.

INSPIRE™

Our unique manufacturing process ensures that each board of UltraDeck® Inspire™ comes with beautiful, dramatic color variations, resulting in no two boards looking the same. Featuring a deep woodgrain pattern and a low sheen appearance, Inspire™ not only looks stunning, but is highly scratch, fade, stain, and impact resistant. Get inspired.

REALISTIC WOOD EXPERIENCE
UltraDeck® Inspire™ features a deep woodgrain pattern and low sheen appearance, creating a look that is true to wood.

MAXIMUM DURABILITY
All UltraDeck® Inspire™ boards have a platinum top coating, engineered with unyielding resistance to the elements of nature, preventing fading, splintering, cracking, rotting, and insect infestation.

BUILD WITH CONFIDENCE
UltraDeck® Inspire™ boards are backed by the UltraDeck 25-year limited warranty.

RUSTIC™

UltraDeck® Rustic™ provides the look of real wood without the upkeep. Rustic™ contains special UV additives and consistent color the whole way through the board, providing a level of fade resistance that ensures your decking will take on a more natural color after exposure to the sun. Unlike wood, Rustic delivers superior durability against splintering, cracking, rotting and insects.

REALISTIC WOOD EXPERIENCE

UltraDeck® Rustic™ looks like vintage and reclaimed wood without the splintering, splitting, or protruding screws.

MATURERS OVER TIME

Elements of nature cause some color fading to a more natural, rustic color, within 30-60 days of exposure to weather. The fading process completes in about a year.

BUILD WITH CONFIDENCE

UltraDeck® Rustic™ boards are backed by the UltraDeck® 10-year limited warranty.

OUR DIFFERENCE IS IN THE TOP CAP

The top cap is an additional layer of protection fused to the composite deck board to provide extra durability and strength.

PLATINUM

Provides top of the line protection on the top and edges of each board with our best fade, slip, scratch, and stain resistance. Moreover, this extra-tough top cap is matched with highly refined color blends and texturing to emulate the best in nature. Platinum is the picture-perfect combination of aesthetics and performance.

PREMIUM

Delivers a superior fade, slip, scratch, and stain resistance, plus boasts multi-toned colors that make the appearance of each individual board unique.

STANDARD

Features bold, modern colors and enhanced fade, slip, scratch, and stain resistance.

I LOVE TO BE OUTSIDE, I SPEND A LOT OF TIME ON MY ULTRADECK WITH FRIENDS AND FAMILY.

-LINDA
ACCESSORIES & HARDWARE

It's easy and simple to install UltraDeck over an old deck, or onto an existing or new substructure, with our full range of fasteners and accessories.

CLADDING

Use as skirting to cover joists, exposed lumber, and stair stringers, providing a professional, finished appearance. Available in 12' lengths in:

- UltraDeck® Rustic™ - Cedar, Gray, Redwood, Hickory (10 1/4" wide profile): SKU's: 112-2513-2619
- UltraDeck® Triumph™ - Slate, Pecan (12 1/4" wide profile): SKU's: 112-0321-0008
- UltraDeck® Fusion® - Coastal Cedar, Driftwood Gray, Rosewood, Walnut (12 1/4" wide profile): SKU's: 112-0007-0002
- UltraDeck® Inspire™ - Canyon, Fieldstone, Spanish Cedar, Sandstone (12 1/4" wide profile): SKU's: 112-0012-0389

END CAPS

End caps help prevent moisture, dirt, and insect infiltration. They give a clean and professional look to any deck. Available in Natural deck and radius edge boards.

- Natural 4" SKU: 112-3000
- Natural 6" SKU: 112-2999
**Grip Fast® UltraDeck® T-Clips**

Composite fastener for Inspire™, Fusion®, Triumph™, Rustic™ and Natural™ Decking. T-Clips® are installed with a drill and screw and will automatically set the proper side gap on decking.

- 100 ct: SKU: 230-8124
- 25 ct: SKU: 230-8122

---

**GripFast® Composite Deck Screws**

Optional surface fastener for Rustic™ or Natural™ Radius Edge Boards only. Color matched and designed to reduce "mushrooming" effect of composite material.

SKU's: 230-8045-8062

---

**DekMount® Hidden Fastening System®**

Recommended for all stair treads, deck boards, and radius board installation to provide a clean, finished look. Available in 8’ long, brown powder-coated finish. 3/4” DekMount® premium screws are designed to be used to install both bracket and deck board.

- DekMount®: SKU: 155-1376
- Screws: SKU’s: 229-1000-1004

---

**Composite Cladding Screws**

For use on all UltraDeck® Cladding, color matched and designed to reduce "mushrooming" effect of composite material. Actual length of 2”.

SKU’s: 230-8070-8098

---

**QuickCap™ Hidden Fastener**

For use on UltraDeck® QuickCap™. Automatically sets the recommended gapping between the boards for a clean finish.

SKU: 112-3338

---

**Grip Fast® UltraClip™ Hidden Deck Fastener System**

Designed for UltraDeck® Fusion™ and UltraDeck Rustic Decking to create a strong and beautiful fastener free finished look.

- UltraClip 45 pc.: SKU: 230-8114
- UltraClip 90 pc.: SKU: 230-8112

FAQS

Planning to build your own deck, or just after more information about UltraDeck® and living the Deck Life? Read on.

WILL I NEED EXTRA TOOLS IN ORDER TO WORK WITH ULTRADECK®?

UltraDeck® doesn’t require specialized tools for installation. It can be cut and worked with much the same as wood. Use Masterforce® Composite Decking Blade (SKU 252-6662 7/4” or SKU 252-6663 10”) for any cutting. Easy-to-use Product Installation Guides are provided with tips and instructions for construction.

CAN ULTRADECK® BE PLACED OVER A SOLID SURFACE?

UltraDeck® decking boards can only be installed over a solid surface when using a sleeper system to buffer between the solid surface and the decking. Water must be able to flow through and away from the deck while maintaining an adequate airflow to the underside of the boards. If updating the look of an existing deck is the goal, Quick Cap™ by UltraDeck® is a great and affordable product designed to be installed directly on top of an existing deck in good condition.

CAN I PUT A HOT TUB ON ULTRADECK®?

The substructure of a deck determines if it can support a hot tub. Since UltraDeck® is not a load-bearing product, the joists of the structure should be used as a support. Any load bearing pillars or legs should be placed directly above a deck joist or sister joist in this application. Please check local building codes for specific requirements.

CAN I PAINT OR STAIN MY ULTRADECK®?

Painting or staining is not recommended, for they do not adhere well to the surface of most UltraDeck® products. However, the woodgrain side of the UltraDeck® Natural™ boards may be stained with a good quality, composite deck stain after one year of adequate weathering. If a composite deck stain is used, always follow the stain manufacturer’s recommendations. Keep in mind that staining decking is not a one time application; this will add more maintenance to your low-maintenance composite decking materials.

Planning to build your own deck, or just after more information about UltraDeck® and living the Deck Life? Read on.
**CAN COLOR DIFFERENCES OCCUR IN ULTRADECK® PRODUCTS?**

UltraDeck® does contain real wood fibers, and like real wood, color differences may occur. Because this does occur, deck boards should be distributed in a way that creates an appealing, natural look.

**CAN ULTRADECK® BE USED IN DOCKS AND WATERFRONT DECKS?**

UltraDeck® products have been used in many of these applications. As long as installation instructions are followed, UltraDeck® works well and is aesthetically pleasing in all types of waterfront applications. Please check local building codes for specific requirements.

**WHAT LENGTHS OF ULTRADECK® ARE AVAILABLE?**

UltraDeck® planks are available in 8’, 12’, 16’, and 20’ lengths, providing enough sizes to construct projects while minimizing unused excess material.

**CAN ICE MELTING PRODUCTS BE USED ON ULTRADECK® PRODUCTS?**

Yes, non-corrosive and non-dyed varieties should be selected for use on UltraDeck® products. Once the ice melting product has melted unwanted ice, the remaining solids should be swept away. As with any surface, prolonged exposure to ice melting products can lead to a residue appearing on the decking. Once warm weather permits, wash the deck of residue left by melted ice and snow. Never use a metal snow shovel, or shovel with a metal edge on an UltraDeck® deck. The shovel may scratch the deck, which is not covered under warranty.

**HOW DO YOU CLEAN ULTRADECK® DECKING?**

UltraDeck® should be periodically cleaned with soap and water or any product made for washing composite decking. Check out the how-to-video for cleaning any UltraDeck® decking and railing products on ultradeck.com. Refer to the installation guide for more information on how to clean UltraDeck®.
Building a deck doesn’t have to be daunting. With UltraDeck®, you don’t need any specialized tools or training. But if you’re still struggling to find the confidence you need to turn your dream deck into a reality, then visit our website. At ultradeck.com, you’ll find an easy-to-use deck-building tool, a library of installation and maintenance videos, and even a handy little calculator to tell you how many fasteners you’ll need to secure your deck. It’s all there, on our website.
