Rigid Steel Construction with Advanced Paint System
Durable, 24-gauge galvanized steel resists rust, peeling and warping. Thick wood stile, reinforced lock-block and composite rail perimeter provide maximum protection against unwanted visitors and heat or cold penetration. 7-step finishing process provides a guaranteed smooth finish that is resistant to ultraviolet rays and made to last a lifetime.

Polyurethane Foam Core
Environmentally friendly sprayed-in foam core fills every inch of the door, making MASTERCRAFT® Steel Doors one of the most energy efficient doors on the market.

Energy Efficient Insulated Glass
Triple-pane, insulated and tempered decorative glass with secured frame for maximum watertight and airtight performance.

High Performance Compression Weatherstripping
• Reaches further and fits tight against the edge of the door.
• Flexible to protect the entire perimeter of the door.
• Highly durable, easy to replace

Corner Seal
• Provides added protection at the bottom corner of the door against air, water, and light.

Complete Frame System
• Choose from multiple frame options to fit your lifestyle and your budget.
• Paintable, clad, and low-maintenance composite frames.
• Fully assembled, routed for cross bores, with weather-stripping applied.

Flexible, Bulb and Fin Sweep
• Works with the adjusting sill to create a tight seal and prevent water and air infiltration.
• Combination of bulbs and fins provide maximum protection.

Adjusting Composite Sill
• Creates a tight seal against the door sweep.
• Composite and aluminum construction provides durability.
• High–dam design exceeds air and water infiltration standards for maximum protection.

Hinges
• Three hinges durable and prevent the door from sagging.
• Choose from Brass, Satin Nickel or Oil-Rubbed Bronze.

Hinge and Sill Finish Options
- Brass
- Satin Nickel/ Aluminum
- Oil-Rubbed Bronze

It All Starts with the Components
